During my studies in Italy, I participated at the realization of P.E.A.M. (Pescara Electronic Artists Meeting) in 2004. Also in 2004, for the realization of a concert in Parma, Italy I was responsible for the video installation at the background of the stage and at the same year I presented my personal exhibition at the Ecoteca club in Pescara, Italy.

In the field of Architecture during my studies, I created various very precise handmade models and I developed design skills which helped me professionally to handle a variety of project briefs. My collaboration with several architectural studios confirms my ability of design in every scale of projects and my personal assignments cover a big range of activity in architecture, graphic design and art.

In November of 2014 I curated my second personal exhibition of art in the cultural centre of Neo Psichico, Athens with the title 'WORKS'
